

Introducing **LUKE WILSON**

Luke Wilson is 18 years old and lives in the supported living scheme in Newcastle-upon-Tyne. Luke has learning disabilities also problems with his hearing. The supported living scheme is designed to help young individuals through the transition from moving from the family home, to eventually having the life skills to live in their own tenancy within the community.

Luke has a strong family network and returns to the family home at weekends. He also attends college three times per week. Luke's family/lecturers and care staff fully support him in his daily life reminding him of appointments, supporting him with college and his general well-being.

OUR SOLUTION

"The system was commissioned to help Luke build his life skills and become more independent in his daily routine."

grandCARE was installed in his flat when he move into the supported living sheme in June 2017. The system was commissioned to help Luke build his daily routine, keeping him connected and informed. The system has fully met the expectations of everyone concerned in Luke's care circle.

WELLNESS

Prompts have been set in Luke's schedule to remind him to do his daily hygiene routine and daily tasks he has to do around the home. Luke also gets prompts on the days he attends college for a wake up call/time the taxi is picking him up and anything he needs to take that day.

"He takes his grandCARE system home to retain his independence."

When Luke goes back to the family home at weekends the care team and his parents want him to keep his daily routine. In which he takes his grandCARE system home to retain his independence in the family environment.

REPORT/MONITORING - SUPPORT PLAN & NOTES

The care team uses the notes on a daily basis to keep Luke's parents informed of his moods and achievements. The notes section is also completed by his Mum when Luke is staying with her to inform the care team of any episodes that have occurred over the weekend.

The College also have access to grandCARE to keep Luke's Mum and the care team informed of his behaviours at college.

Using the notes is invaluable to all parties to keep concerned and informed to proved Luke with the wrap around care he needs.
